

DISCOVERING GEMSTONES

Instructions

Setting Up

- Empty 1 bag of sand into each of the box containers (please note no water is required, this is a dry activity)
- Then put 8 tiny coloured stones in each plastic box and mix with the sand so the child can not see them.
- Display the prizes (coloured gemstone in Presentation box) on the table.
- Display your selling prices.
- You are now ready to start the activity.

How the activity works

Child/parent pays £1.50 (please ensure customers pay before commencing to avoid confusion of who has or has not paid).

The Child sieves through the sand with their hands until they have found 6 tiny coloured stones (please note the child should hold on to each tiny stone until they have collected all 6). Once they have handed over the 6 tiny coloured stones to you, you can present them with their gemstone in presentation box.

Notes; this activity has been timed for approximately 7 to 10 minutes for each child to find 6 tiny coloured stones. Although we have done our own tests, we would appreciate your feedback.
